Recruiting Team

Google Canada

Dear Hiring Committee,

I am writing to express my strong interest in the Software Developer Intern (BS) position for Summer 2026. I am confident that, if given the opportunity, I could be a valuable contributor to your team and help grow innovative projects. I have been deeply involved in independent training in software development since July 2023, but my passion for programming began much earlier. I was accepted to a Computer Science program at a CEGEP in Canada and plan to begin my studies after the internship.

Using my skills to contribute to Google's noble mission is one of my greatest dreams. I am deeply excited about Google's commitment to innovation, mentorship, and impact. I am confident in what I know, yet humble enough to recognize that I still have much to learn. I am particularly inspired by how Google integrates Artificial Intelligence and Software Engineering to solve global-scale challenges. I hope to contribute my curiosity, problem-solving mindset, and eagerness to learn within such a dynamic team.

Currently, due to financial reasons, I was unable to start my CEGEP studies as an international student. However, this is far from a lost year — I decided to dedicate this time to perfecting my skills: intellectually by learning new programming languages and techniques, and personally by developing emotional intelligence, teamwork, leadership, and even exploring hobbies such as learning Italian and cooking. I plan to resume my Computer Science studies immediately after completing the internship, in the next available academic term, when my situation will allow me to pursue the studies I deeply aspire to.

Thank you for considering my application. I look forward to the possibility of contributing to Google's mission while continuing to grow as a developer.

Sincerely,

Fiorella Rios Campos
